DESCRIPTION OF PARTS

1. Button
2. Digital screen
3. Control panel
4. Misting plate
5. Air guide wheel
6. Front cover
7. Water level view
8. Anti-tilt bar
9. Handle
10. Back guard
11. Water tank
12. Drain cover
13. Swivel castor
14. Power cord

HOW TO USE THE APPLIANCE

The appliance does not need to be installed.

Position the unit on a flat, stable surface and connect the power cord to a suitable power socket (230 V~): you will hear a sound to indicate that the appliance is in standby and the fan can be switched on using the ON/SPEED button. The fan can be switched off using the OFF button.

When you move the appliance, use the handle on the back. Do not use this fan in an area with high humidity, rich of dust or with a temperature exceeding 40 ° C.

This product can be used both as a fan, with 3 modes (Normal, Natural and Sleep) and 3 fan speed options (low, medium and high) and as nebulizer.

MISTING FUNCTION

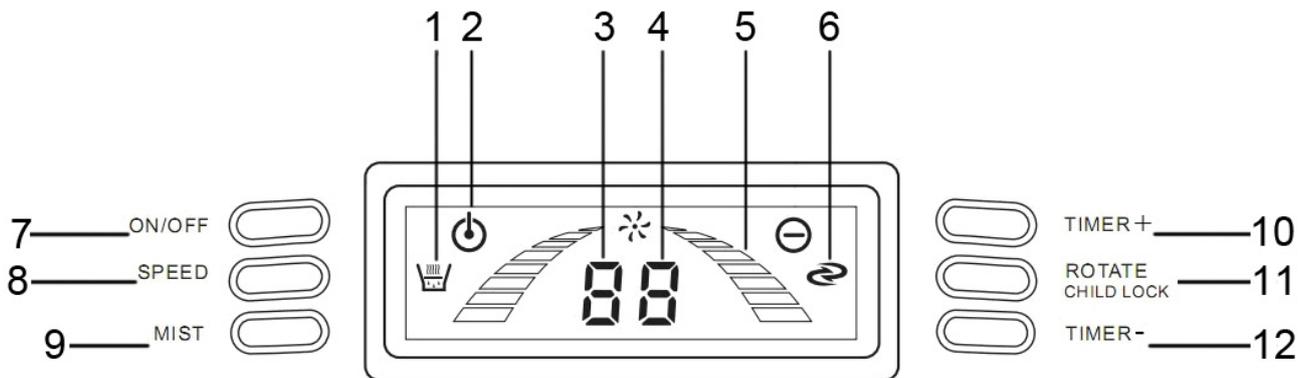

In this case the rear tank should be filled with demineralized water, up to but not exceeding the maximum level as indicated.

Through a high-frequency vibration (not audible and not harmful to people) the water under the tank is nebulized and sucked into the tube up to the misting plate where it is emitted into the room.

There is no need to heat or to add any chemical agent. The refreshing action of water can give a sense of well-being when the environment is dry.

When the water below the tank falls below the minimum level, the appliance emits a sound and the nebulizer switches off.

CONTROL PANEL AND AVAILABLE FUNCIONS

L'apparecchio può essere usato come nebulizzatore anche a ventilazione spenta tramite i pulsanti MIST. La velocità di ventilazione (1,2,3) rimane in memoria quando si spegne la ventilazione con il pulsante OFF.

DISPLAY

HOW TO INSERT / REMOVE THE REMOTE CONTROL BATTERIES (refer to the diagram below)

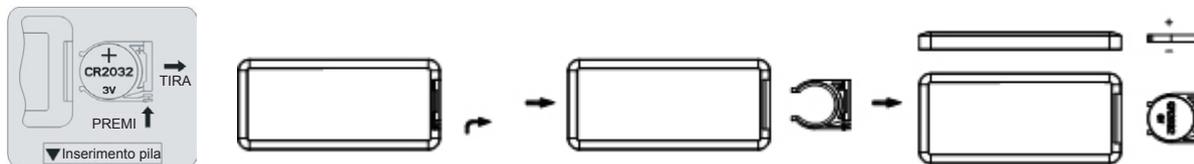

Open the battery cover on the back of the remote control (press and pull the cover).

Place the batteries inside the cover, making sure the polarity is correct.

Slot the cover back into position on the remote control.

Use cells model no. LR03AAA 1,5V, compliant with Battery Directive no. 2006/66/EC.

Remove the batteries when not using the remote control for a long period of time.

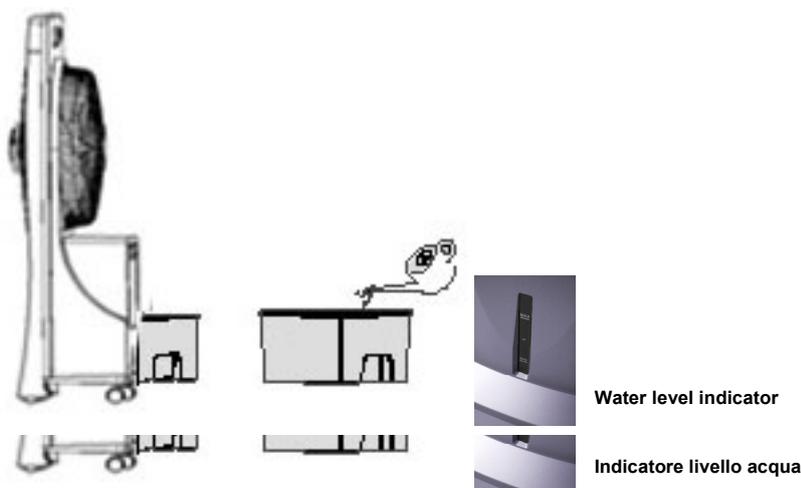

INFORMATION FOR CORRECT DISPOSAL OF THE BATTERIES IN ACCORDANCE WITH EUROPEAN DIRECTIVE 2006/66/EC

Please replace the battery when its electrical charge has been exhausted: at the end of its useful life, it must not be disposed of together with unsorted waste. It must be delivered to appropriate separated waste disposal plants or to dealers that provide a similar service. Separate waste disposal of batteries prevents potential negative effects on the environment and human health resulting from inadequate disposal, and also allows the materials from which it is made to be recovered and recycled in order to achieve significant savings in terms of energy and resources. The separate disposal obligation is underlined by the crossed-out dustbin symbol appearing on the battery. Illegal disposal of the product by the user shall result in the application of administrative sanctions as defined by current regulations.

FILLING THE WATER TANK

THE TANK MUST BE FILLED WITH DEMINERALIZED WATER IN ORDER TO OPERATE THE APPLIANCE IN MISTING MODE.

MAINTENANCE AND STORAGE

WARNING: ALWAYS UNPLUG THE APPLIANCE BEFORE CLEANING OR MAINTENANCE PROCEDURES.

IMPORTANT: DO NOT SUBMERGE THE PRODUCT IN WATER.

Cleaning the outside surface of the appliance

Use a soft cloth to remove any dust from the product.

If this is not enough, use a soft cloth dampened with water and a mild detergent at a temperature not exceeding 50°C. Let the appliance dry completely before using it.

Do not use corrosive detergents or solvents such as petrol. Do not wash the appliance with water. Do not use oils, chemical substances or other items that may damage the surface to clean it.

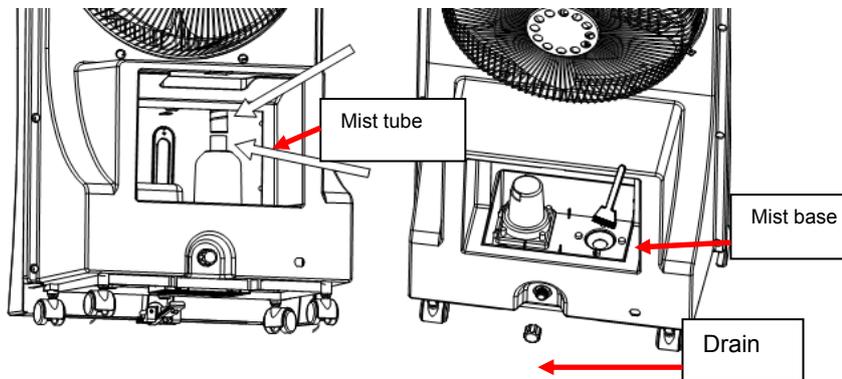

Use a vacuum cleaner to remove dust from the air inlet/outlet grilles.
